4 SPECIAL FEATURE

BIOTECH FOR LONGER, HEALTHIER LIVES

- 4 **Helping stem cells overcome degenerative muscle disease**
- 6 Elucidating neural tube patterning
- 7 Sugar/protein synergy for tissue regeneration
- 8 A novel bioreactor to mimic liver function
- 9 The potential of carbon nanotubes
- 9 Cell therapy for immunodeficiencies
- 10 Compartmentalisation of DNA repair
- 11 Biocompatible molecular sensors
- 11 Printed cartilage implants

12 BIOLOGY AND MEDICINE

- 12 **At the threshold of personalised cancer treatment**
- 13 First natural product against mesothelioma
- 14 Smarter, faster, stronger drug therapies
- 15 Comparing the male and female brains
- 16 Nanotech images to prevent diabetes
- 17 Studying the underlying causes of memory loss
- 17 Encapsulated liquids mimic our eye lenses

18 SOCIAL SCIENCES AND HUMANITIES

- 18 **Socio-economics for balanced and effective security solutions**
- 19 Fostering creativity through early science and mathematics education
- 19 The role of Catholicism in civil society
- 20 Deconstructing racism in the classroom

21 ENERGY AND TRANSPORT

- 21 **Research to help reduce the risk of aircraft accidents**
- 22 High-resolution sensor network to monitor turbine blade performance
- 23 My car drives, parks and charges itself for me
- 24 The third generation of electric vehicles
- 24 Reducing energy use by airports
- 25 Rotorcraft technology — up the next level

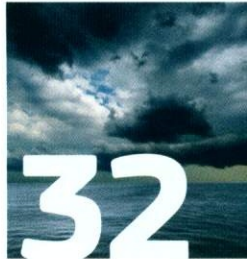

26 ENVIRONMENT AND SOCIETY

- 26 **Interactive linking of climate data from multiple sources**
- 27 Industrial pollution in the Mediterranean
- 28 Role of microorganisms in activated sludge

- 28 Measuring your way to a healthier environment
- 29 Tools to control animal diseases
- 30 Tomato and potato isoprenoid factories
- 30 Effect of species loss on marine ecosystems
- 31 Sensing antibiotics in our environment

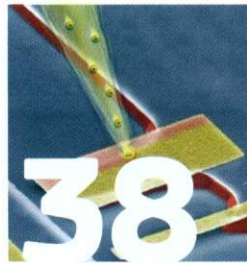

32 IT AND TELECOMMUNICATIONS

- 32 **Building high performance, low cost radar system**
- 33 Assuring privacy in assisted living solutions
- 34 Mind over matter for people with disabilities
- 35 Designing indoor wireless networks
- 35 New ways of exploring Big Data
- 37 Inks for next-generation electronics
- 37 Air traffic control: Safety first

38 INDUSTRIAL TECHNOLOGIES

- 38 **The next generation of 3D printers**
- 39 Enzymes to replace classical chemistry
- 40 Online cleaning for better hygiene
- 40 Titanium aircraft parts without dies
- 41 Better process scheduling aids industry
- 41 Recyclable plastic heating pipes

42 SPACE

- 42 **Space — the final frontier for food**
- 44 Reading the space weather forecast
- 45 Safer spacecraft landing on planets

46 EVENTS
