

# Bulletin

of the

World Health  
Organization

Volume 92, Issue 4, April 2014, 229–308

Abstracts in عربي, 中文, Français, Русский and Español

## About the *Bulletin*

The *Bulletin of the World Health Organization* is an international journal of public health with a special focus on developing countries. Since it was first published in 1948, the *Bulletin* has become one of the world's leading public health journals. In keeping with its mission statement, the peer-reviewed monthly maintains an open-access policy so that the full contents of the journal and its archives are available online free of charge. As the flagship periodical of the World Health Organization (WHO), the *Bulletin* draws on WHO experts as editorial advisers, reviewers and authors as well as on external collaborators. Anyone can submit a manuscript to the *Bulletin*, and no author charges are levied. All peer-reviewed papers are indexed, including in ISI Web of Knowledge and MEDLINE.

## Mission statement

The *Bulletin* seeks to publish and disseminate scientifically rigorous public health information of international significance that enables policy-makers, researchers and practitioners to be more effective; it aims to improve health, particularly among disadvantaged populations.

## Preparation and submission of manuscripts

The *Bulletin* welcomes unsolicited manuscripts, which are initially screened in-house for originality, relevance to an international public health audience and scientific rigour. Manuscripts that pass this initial review are sent for external peer review. Those preparing manuscripts are encouraged to consult the Guidelines for contributors published in the January issue of the current volume and on the *Bulletin* web site at [http://www.who.int/bulletin/contributors/current\\_guidelines.pdf](http://www.who.int/bulletin/contributors/current_guidelines.pdf). These guidelines can also be obtained by contacting the editorial office. All manuscripts should be submitted online at <http://submit.bwho.org>.

## Bulletin web sites
