4 SPECIAL FEATURE

TACKLING DIABETES IN EUROPE

- 4 Food decrypting app for CHO calculation**
- 6 EU stem cell research opens door to new diabetes treatments
- 7 New RNA diagnostics could become the crystal ball of diabetes
- 9 Novel therapeutic targets for diabetes
- 9 A step ahead in the race for an artificial pancreas
- 11 Understanding the activation of BAT for improved diabetes treatment
- 12 The cardiovascular system in diabetes
- 12 Functional food that tastes good
- 14 Milling innovations help food sector tap barley's health properties
- 14 Foot-reading device for personalised footwear

16 BIOLOGY AND MEDICINE

- 16 Cutting-edge video technology brings new anti-malaria concepts**
- 17 Molecular determinants of inflammation
- 17 Exposure therapy for anorexia nervosa
- 18 The value of junk DNA
- 19 3D printing of bone replacements
- 19 A novel biosensor for enteric pathogens

20 SOCIAL SCIENCES AND HUMANITIES

- 20 Online resource provides insights into perceptions of populist ideas**
- 21 Effects of taxation in times of financial distress
- 21 The plight of migrant workers
- 22 New conservation products for historic building materials

23 ENERGY AND TRANSPORT

- 23 Demo plants show potential of algae as sustainable energy source**
- 24 Energy dense lithium battery for the electric car sector
- 25 Omniflow technology combines solar and wind energy
- 26 Enhancing the global travel experience
- 27 Innovative docking tool for cargo shipping

28 ENVIRONMENT AND SOCIETY

- 28 Cleaner skies over Athens**
- 29 Improved and increased turbot production
- 30 Bee movements control reproduction
- 30 Plankton monitoring for climate change

31 IT AND TELECOMMUNICATIONS

- 31 Turnkey solution for a connected self-shopping experience**
- 32 Efficient control software
- 33 Spying out user preferences
- 33 Affordable IT solutions to help SME logistics firms get ahead
- 34 Increasing passenger comfort thanks to virtual reality

35 INDUSTRIAL TECHNOLOGIES

- 35 Robotic co-worker for Europe's ship services sector**
- 36 New packaging materials from cheese
- 37 Sustainable chemical production
- 38 Laundry with less water and less time
- 39 New lasers for low-cost industrial processing
- 39 Safer and greener flame retardants
- 40 New ceramic materials

41 SECURITY

- 41 New devices to contain blasts on airplanes**
- 42 New modelling tool for better crisis management
- 43 Cutting-edge technology in the fight against global financial crime

44 SPACE

- 44 Advanced protection from solar storms**
- 45 Cryogenic space exploration missions
- 46 Prepare for landing on planets
