**SPECIAL FEATURE**

# WHERE SCIENCE MEETS SECURITY

- 4 Paving the path from increased trust to more powerful cloud applications**
- 6 A tactical approach to counterterrorism
- 7 New detection sensors can help railways cope with EM attacks
- 9 TIRAMISU demonstrates new demining tools in Brussels
- 10 Addressing security challenges
- 10 PERSEUS researchers move one step closer to EU maritime surveillance system
- 11 Monitoring terrorist threats with an urban sensor network
- 12 Networking to improve food biosecurity
- 13 Protecting civilian infrastructure against electromagnetic attack
- 14 Better understanding public views on security and privacy
- 14 Promoting best practice in cyber defence
- 15 3D acquisition of forensic evidence presents crime scene analysts with new perspectives

## 17 BIOLOGY AND MEDICINE

- 17 Helping stroke patients to regain their independence**
- 18 How rapid TB testing could revolutionise global healthcare
- 19 Brush and floss often to ward off heart attack
- 20 Miniature devices for biomedical use
- 20 A breathtaking solution to early cancer detection
- 21 Clinical applications of electroporation
- 22 Genome regulation during embryogenesis

- 34 Trees are millennial temperature gauges
- 34 Hydrogen diffusion in the Earth's interior
- 35 Biosensors for environmental monitoring

## 36 IT AND TELECOMMUNICATIONS

- 36 WALK-MAN makes engineers proud at DARPA Robotics Challenge**
- 37 Analysing the cloud
- 38 Better robotics exploiting visual attention
- 39 Multimedia meet next-generation wireless networks

## 23 SOCIAL SCIENCES AND HUMANITIES

- 23 The effects of new public management**
- 24 SMEs and experience staging
- 24 Accentuating the positive in news media
- 25 Boosting research on glottalisations

## 40 INDUSTRIAL TECHNOLOGIES

- 40 Robot walker for elderly people in public spaces**
- 41 Toward DNA-based nanomaterials
- 42 Organic molecules for new devices

## 26 ENERGY AND TRANSPORT

- 26 Help for rail industry on cutting pollutants from diesel engines**
- 27 Air puffs in the right places
- 28 New device turns sunlight into hydrogen
- 29 Software for driverless vehicles
- 30 Modelling airframe noise

## 43 SPACE

- 43 Shields up for manned space exploration**
- 44 Zero downtime for GNSS applications
- 44 A common language to boost future space expeditions
- 45 From Galileo to multi-system positioning

## 31 ENVIRONMENT AND SOCIETY

- 31 Scrutinising snow and ice from space**
- 32 Improving predictions of climate change impacts
- 33 Why dragons lose colour with age
- 33 Genes controlling mate choice

## 46 EVENTS
